

CREATE Travel Grants

The CRE-PF CREATE Program was established to train the next generation of outstanding investigators capable of developing and translating knowledge from bench-to-bedside, with a focus on the prevention of end stage fibrotic lung disease and new treatments to improve the respiratory health of Australians living with pulmonary fibrosis.

A key component of the CREATE program is to support travel. The CRE-PF CREATE program offers travel grants to CREATE Fellows, subject to availability of funding. Travel may include presenting at a conference, visits to a mentor's research centre or for training/ short-term work in laboratories.

Funding to support trainees to attend and present at a conference will be considered based on individual circumstances and funds available. In these situations, matching funds should be provided where possible.

Preference for travel grant funding will be given to CREATE Fellows dependent on a PhD scholarship or a part-time salary.

Use:

Travel grants may be used for transportation, accommodation, and a living allowance. Bench fees and project consumables will not normally be covered.

Value:

CREATE Fellows can receive up to \$2,000 during the time of their training period, subject to availability of funds. This funding can be awarded as either:

- One travel scholarship of up to \$2,000 (total amount)
- Two travel scholarships of up to \$1,000 (half amount)
- Other amounts not exceeding \$2,000 in total

Application process:

Applicants must complete the application form below and include:

- A description of the proposed visit
- Justification for the travel and expected benefits
- Whether the CREATE Program has funded previous travel.
- Application deadlines are twice per year (Feb/Aug) and applicants should submit an application with quotes at least 2 months prior to the expected start date.
- Applicants presenting at a conference must attach the abstract and provide certification that the abstract has been accepted for presentation.
- Applicants must provide evidence (i.e. emails) that the travel has been discussed and approved by the host laboratory/institution.
- Where possible, applicants should combine activities (conference attendance, lab visits) to maximise their time.

Centre of Research Excellence in
Pulmonary Fibrosis

CREATE Researcher Development

- Applicants should submit a copy of their CV with the application

Applications will be reviewed by the CREATE Program Advisory Committee (PAC) after they are received.

- Award funds will be dispersed either through direct payment to the applicant's nominated bank account or through purchase order if through an official university travel agent.
- Applicants will be notified whether they have been successful or not within 2 weeks of submission.
- It is expected that successful applicants will provide a brief description of their travel, including any outcomes or benefits for their future research, within a month of return.

Additional requirements:

Completed applications are to be submitted to Bonnie.Laxton-Blinkhorn@sydney.edu.au

If applications are incomplete, they will be returned to applicants to be amended and re-submitted.

Further Information:

Applicants are encouraged to get quotes for travel, accommodation, conference registration and include this with their application.

Any difference in costs between the time of quote and funding should be discussed and approved by the CREATE Training Program Coordinator.
